Abdul Hanan

Front End Web Developer

Summary

As a front-end developer with 6 months of experience, I bring a strong passion for web development and a solid foundation in HTML, CSS, and JavaScript. With a keen eye for design and attention to detail, I'm able to create beautiful and functional websites that meet the needs of clients and users alike. During my time as a front-end developer, I have gained experience in developing responsive and mobile-first websites using CSS frameworks such as Bootstrap and Tailwind CSS. These frameworks have allowed me to create visually stunning designs and dynamic user interfaces that provide a seamless user experience.In addition to my technical skills, I pride myself on my ability to communicate effectively with clients and team members. I am always eager to learn and collaborate with others to create the best possible outcomes for projects.
